

Soil Erosion and Sediment Control Planning for North Queensland

A comprehensive training course developed by industry leaders in Soil and Water Management in Queensland in conjunction with the Townsville City Council

7-11 November 2005
Townsville Plaza Hotel,
Cnr of Flinders Mall & Stanley Street, Townsville

The 5-day training course has been developed under the auspices of the Townsville City Council to provide the necessary training for professionals seeking to design, implement and assess Soil Erosion and Sediment Control Plans in North Queensland. The course is accredited by Townsville City Council and has been submitted to the International Erosion Control Association (IECA) for recognition.

Course Content

Participants have the opportunity to attain a detailed understanding of drainage and erosion and sediment control techniques for building sites, transport corridors, subdivisions and engineering construction works.

Course Outcomes

- Detailed understanding of local laws regarding Erosion Soil Control
- Detailed understanding of soil properties, soil testing and soil adjustments.
- Detailed knowledge of revegetation techniques, management and maintenance.
- Ability to assess site constraints and erosion hazard/risk
- Ability to prepare ESC Plans and supporting documentation/reports.
- Ability to supervise the construction of a full range of ESC techniques.
- Ability to carry out site inspections.
